---

## Projects

---

### Professional Experience

Software Engineer, Feli Tech

*March 2022 – Present, Jodhpur*

#### Decor System:

- **Multi-page application:** Developed from scratch without frameworks
- **Logic:** Used jQuery for application logic
- **Animations:** Implemented with mutation and intersection observers
- **Page Access:** Restricted page access setup
- **Smooth Scrolling:** Enabled with GSAP
- **Features:** Added product-based features, including a cart system
- **JSON Operations:** Read, write, and create JSON for application settings
- **API Integration:** Used API calls to manage data flow between pages
- **Function Calling:** Optimized function-calling for better performance

### NoteApp:

- **Web App:** Built a note-making app with React components
- **Database:** Used MongoDB for data storage with CRUD operations
- **User Authentication:** Implemented secure login for user-specific data access
- **UI:** Designed an enhanced interface using MaterialUI
- **JSON Operations:** Handled JSON read, write, and create for local data management
- **API Integration:** Managed data communication with API calls to the server
- **Function Calling:** Applied efficient function-calling techniques for smooth user interactions

---
